Semanan, Jakarta Barat

Profile

I am Yoseph Marciano Moniaga, a 5th-semester Mobile Application and Technology student at Binus University. With experience in mobile and web development, I'm skilled in C, Java, Python, JavaScript, Kotlin, MySQL, HTML, CSS, and Flutter. I'm currently seeking an internship to further develop my skills and gain hands-on industry experience.

Project Experience

Willify

Willify is a simple music streaming app built using HTML, JavaScript, and CSS. It allows users to listen to their favorite songs through an intuitive and responsive interface. Similar to popular apps like Spotify and other music platforms on the Play Store, Willify offers an easy way to enjoy music, but with a lightweight design tailored for seamless web use.

Alcia

Alcia is a scholarship discovery app designed to help users find scholarships available across various universities in Indonesia. Built with Flutter, Alcia offers a user-friendly experience where individuals can explore different scholarship options. Additionally, if users are unsure of which scholarship to choose, the app provides a test to guide them in selecting the best fit based on their preferences and qualifications.

Puff and Poof and Figure It Out

marketplace application for buying and selling different product like dolls and action figure. developed using kotlin and android studio with uses like shopee, tokopedia.

Virtual Fitting Room

Virtual Fitting Room (VFR) is an innovative app developed with Unity, using cutting-edge augmented reality technology. It allows users to try on clothes virtually, simply by scanning their body, providing a seamless online shopping experience. By reducing the need for physical contact, VFR offers a safer and more convenient way to explore and purchase fashion items from the comfort of your home.
